

Look for -vs- Find (1)

*When you **Look for** something, you don't know where it is, so you are searching in many places to **find** it. (this takes time)*

*When you **Find** something, you locate where it is, or you have learned where something is. (doesn't really take time)*

Bob has spent hours **looking for** his car keys. (He doesn't know where they are.)

I was walking on the beach and **found** a diamond ring! (I by chance discovered it in the sand.)

*Choose **look for** or **find** for the blank spaces below. (watch out for tenses!)*

1. On the way home Kim _____ a \$100 bill on the street.
