

How much are those jeans? (2)

This sheet works by asking how much things cost and what the shop staff will say back to you.

Sometimes when you say, “How much are those jeans?”; the staff may not know which jeans you are asking about. So the staff response may be, “Which ones?” Then you will have to say which ones you are asking about, “The black ones.” Then you will get the price, “They're \$89.95.”

Complete the conversations following the examples below:

ex.1)

hat - blue - \$35.00

customer: How much is that hat?

staff: Which one?

customer: The blue one.

staff: It's \$35.00.
